TFC Steering Committee Meeting Minutes

(Send to: tf-openci-triage@lists.trustedfirmware.org)

October 1, 2024

Attendees: Karen, Matt, Olivier, Joanna, Shebu, Anton, Paul

Minutes

- Infrastructure (FVPs in Tux)
    - TF-A
        - Olivier reported two issues
            - There seems to be some slowness on review.trustedfirmware.org and git.trustedfirmware.org
                - Karen to notify the Linaro team and open a ticket
            - It looks like mt8192 Chromebooks are all in maintenance, https://tf.validation.linaro.org/scheduler/device_type/mt8192-asurada-rev1 and failling in timeout in the TF-A CI
                - Karen to notify the Linaro team and open a ticket
        - **Action** on Olivier to follow up with Mark Dykes to ask if these tickets in the TF jira backlog are still relevant (as they are old). Both are listed as 'Major' priorities so I'm not sure why they're in the backlog.
            - [TFC-463] Timeouts occurring in TF-A CI runs related to coverage plugin - Jira (atlassian.net)
            - [TFC-564] TF-A: CI weekly run has random timeouts that prevents coverage analyses - Jira (atlassian.net)
    - TF-M
        - No issues to report
    - MBedTLS
        - No update this week
    - Paul

- Paul is just back from vacation so he'll need some time to get up to speed

- Karen and Paul will discuss his priorities and what tickets are next to be addressed

- Arthur

  - Arthur is also back from his vacation days and is still continuing to work on his priority tickets for IAR Compiler

- Backlog

  - We were able to address 6 tickets in the backlog to determine what is still relevant and what we can close
