

Attendees: Don(Linaro)< Antonio, Mat Toth-Pal, Matteo, Kevin Townsend, Anton Komlev, David Brown, Kangkang Shen, Andrej Butok, Bill Peckham, Kevin Oerton, Shebu, Gyorgy Szing, Michael Thomas

Minutes:

Rust SPMC Prototype - Shebu

- Shebu walked thru the slide
- Under the BSD3 license
- Antonio: Same features as C version?
- Can replace OP-TEE binary in same setup
- LOC?
- Gyorgy: Rust is much smaller, but OP-TEE implements more, so not at a point of a fair comparison. Guessing similar numbers
- Kangkang: Not in CI?
- Correct
- Let Shebu, Antonio, and Gyorgy know if any comments

TF-A roadmap update: Matteo

- See the <https://developer.trustedfirmware.org/w/ta/roadmap/>
- Matteo walked thru is slides

TFX(Trusted Firmware Explored) Tool Mate

- Mate walked through his slides
- No questions
- Mate shared code snippets slides
- Upstreamed?
- No but in the process. No date yet.

AOB

- Anton: TF-M Copyright update. Copyright on all file changes. Discussed in tech forum w/ no objections. No longer require updates on file changes, just file creation. Will reduce review cycle overhead.
